Pinnacle® Sun

Cool Roof Technology that Fights Smog

Let Your Roof Shine

Introducing Pinnacle® Sun architectural shingles. The ultimate combination of style, strength, and performance.

Choose from seven cool colors engineered with 3M™ Cooling Granules to reflect the sun and help lower attic temperatures.

Scotchgard™ Protector helps prevent black algae streaks, and a UL 2218 Class 3 impact rating stands up to damaging hail.

Pinnacle® Sun shingles do more than protect your home. Their 3M™ Smog-Reducing Granules help clean the air around it, too.

The Solar Reflectance Index (SRI) is an indicator of the ability of a roof surface to return solar energy to the atmosphere. Roofing material surfaces with a higher SRI will be cooler than surfaces with a lower SRI under the same solar energy exposure, especially on a sunny day. Using materials with higher SRI values can enhance building occupant comfort and reduce air conditioning use. SRI values listed above are **INITIAL** values from the Cool Roof Rating Council. For more information, please reference the Cool Roof Rating Council: CoolRoofs.org.

To provide homeowners with the most accurate representation of color options, several photo scans and house shots were used under various lighting conditions. Variations in lighting illustrate the color gradients on asphalt shingle roofs.

Color blends vary from shingle to shingle. Before installation, consult with your contractor and request to view the actual shingles being installed on your roof to ensure confidence in your final color selection.

Dreaming of a Home Redesign?

Get creative with the Atlas roof inspiration center. In the Roof & Home Design Studio, you can upload photos of your home and swipe for different looks. With the Visual Product Selector, you can explore Atlas shingle styles, features, and colors to help you visualize and choose the perfect roof for your home.

Backed by the Power of 3M™ Scotchgard™ Protector

Atlas shingles with 3M™ Scotchgard™ Protector are the only shingles in the industry with a Limited Lifetime Warranty providing long-term protection against black streaks caused by blue-green algae. This innovative technology, which includes copper-containing granules, allows copper ions to release over time, helping to prevent the ugly streaks caused by algae.

• Prevent Unsightly Black Streaks Caused by Algae

• New Cool B

Harness the Power of the Sun

According to the Cool Roof Rating Council (CRRC), the average energy savings for a cool roof is up to

15%

of total cooling costs.

Improving Air Quality One Roof at a Time

Breathe easy with Pinnacle® Sun shingles. This advanced roofing solution not only protects your home but also helps improve air quality with patented 3M™ Smog-Reducing Technology. The 3M™ Smog-Reducing Granules found in Pinnacle® Sun shingles are formulated with a photocatalytic coating activated by the sun's UV rays, transforming nitrogen oxide gases in the air around your home into a water-soluble, plant-useable nitrate that washes away with rainwater.

Improving Our Climate
3M™ Smog-Reducing Granules

The Problem

Over time, shingles without proper protection can develop unsightly black streaks caused by blue-green algae.

The Solution

Atlas shingles featuring 3M™ Scotchgard™ Protector fight algae and unsightly black streaks, keeping your roof looking newer, longer.

Light Colors Reflect the Heat

• Inspired by the Power of Trees

Pinnacle® Sun

Cool Roof Technology that Fights Smog

Pinnacle® Sun architectural shingles are where function meets beauty. With protection against harsh sunshine, smog, algae and high winds, you're investing in a durable roofing system that looks great and is built to last.
